

Cenium Energy Efficiency Software

Microsoft
GOLD CERTIFIED
Partner

Microsoft Dynamics for the Hotel Industry
One Solution, One Database, All Microsoft

The Cenium Energy Efficiency software will help you reduce energy consumption, increase profit and reduce greenhouse emissions.

Unlimited number of zones

The system supports unlimited number of energy zones in the hotel and can be used with or without individual room h-vac control system

Automated room allocation

Cenium Energy Efficiency Software calculates the future occupancy and generates an energy optimized allocation order of rooms and will also during check in suggest the most energy efficient way of allocating guest in the hotel.

Automated climate control

According to check in times, the heating / cooling is automatically switched on at a pre-set time interval before guest's arrival.

Auto-off at check out

The staff can enter their entry and departure via simple logon form.

Time registration

When guest checks out the status of the room is recalculated. If the room is not booked for the next night, the heating or cooling is switched off.

Statistics and reports

Functions for statistics are included, providing a detailed view of actual savings in KWh.

The energy zone forecast can also be part of the housekeeping report in order to assist the housekeeping and maintenance department to manually set the room energy status if the system is used without interfaced h-vac system.

Cenium AS

Cenium AS is the developer of Cenium Hotel Management System, successfully proven by chains and individual hotels in Norway, Sweden, Denmark, Iceland and USA

Cenium is a Gold awarded development center and partner in the Microsoft Dynamics NAV (formerly called Microsoft Navision) community.
